

§ 679.9 Penalties.

See § 600.735 of this chapter.

Subpart B—Management Measures

§ 679.20 General limitations.

This section applies to vessels engaged in directed fishing for groundfish in the GOA and BSAI.

(a) *Harvest limits*—(1) *OY*. The OY for BSAI and GOA target species and the “other species” category is a range that can be harvested consistently with this part, plus the amounts of “nonspecified species” taken incidentally to the harvest of target species and the “other species” category. The species categories are defined in Table 1 of the specifications as provided in paragraph (c) of this section.

(i) *BSAI*. The OY for groundfish in the BSAI regulated by this section and by part 600 of this chapter is 1.4 to 2.0 million mt.

(ii) *GOA*. The OY for groundfish in the GOA regulated by this section and by part 600 of this chapter is 116,000 to 800,000 mt.

(2) *TAC*. NMFS, after consultation with the Council, will specify and apportion the annual TAC and reserves for each calendar year among the GOA and BSAI target species and the “other species” categories. TACs in the target species category may be split or combined for purposes of establishing new TACs with apportionments thereof under paragraph (c) of this section. The sum of the TACs so specified must be within the OY range specified in paragraph (a)(1) of this section.

(3) *Annual TAC determination*. The annual determinations of TAC for each target species and the “other species” category, and the reapportionment of reserves may be adjusted, based upon a review of the following:

(i) *Biological condition of groundfish stocks*. Resource assessment documents prepared annually for the Council that provide information on historical catch trend; updated estimates of the MSY of the groundfish complex and its component species groups; assessments of the stock condition of each target species and the “other species” category; assessments of the multispecies and eco-

system impacts of harvesting the groundfish complex at current levels, given the assessed condition of stocks, including consideration of rebuilding depressed stocks; and alternative harvesting strategies and related effects on the component species group.

(ii) *Socioeconomic considerations*. Socioeconomic considerations that are consistent with the goals of the fishery management plans for the groundfish fisheries of the BSAI and the GOA, including the need to promote efficiency in the utilization of fishery resources, including minimizing costs; the need to manage for the optimum marketable size of a species; the impact of groundfish harvests on prohibited species and the domestic target fisheries that utilize these species; the desire to enhance depleted stocks; the seasonal access to the groundfish fishery by domestic fishing vessels; the commercial importance of a fishery to local communities; the importance of a fishery to subsistence users; and the need to promote utilization of certain species.

(4) *Sablefish TAC*—(i) *Eastern GOA regulatory area*. Vessels in the Eastern GOA regulatory area of the GOA using trawl gear will be allocated 5 percent of the sablefish TAC for bycatch in other trawl fisheries.

(ii) *Central and western GOA regulatory areas*—(A) *Hook-and-line gear*. Vessels in the Central and western GOA regulatory areas using hook-and-line gear will be allocated 80 percent of the sablefish TAC in each of the Central and Western GOA regulatory areas.

(B) *Trawl gear*. Vessels using trawl gear will be allocated 20 percent of the sablefish TAC in these areas.

(iii) *Bering Sea subarea*—(A) *Hook-and-line or pot gear*. Vessels in the Bering Sea subarea using hook-and-line or pot gear will be allocated 50 percent of each TAC for sablefish.

(B) *Trawl gear*. Vessels in the Bering Sea subarea using trawl gear will be allocated 50 percent of each TAC for sablefish.

(iv) *Aleutian Islands subarea*—(A) *Hook-and-line or pot gear*. Vessels in the Aleutian Islands subarea using hook-and-line or pot gear will be allocated 75 percent of each TAC for sablefish.
