

§ 151.26

§ 151.26 Molasses in tank cars.

When molasses is imported in tank cars, the importer shall file with the port director a certificate showing whether there is any substantial difference either in the total sugars or the character of the molasses in the different cars.

§ 151.27 Weighing and sampling done at time of unloading.

Sugar, sirup, and molasses requiring either weighing or sampling shall be weighed or sampled at the time of unloading. When such merchandise requires both weighing and sampling, these operations shall be performed simultaneously.

§ 151.28 Gauging of sirup or molasses discharged into storage tanks.

(a) *Plans of storage tank to be filed.* When sirup or molasses is imported in bulk in tank vessels and is to be pumped or discharged into storage tanks, before the discharging is permitted there shall be filed with the port director a certified copy of the plans and gauge table of the storage tank showing all inlets and outlets and stating accurately the capacity in liters per centimeter of height of the tank from an indicated starting point.

(b) *Settling before gauging.* After the discharge is completed, all inlets to the tank shall be carefully sealed and the sirup or molasses left undisturbed for a period not to exceed 20 days to allow for settling before being gauged. When a request for immediate gauging is made in writing by the importer, it shall be allowed by the port director.

[T.D. 73-175, 38 FR 17470, July 2, 1973, as amended by T.D. 80-142, 45 FR 36384, May 30, 1980; T.D. 89-1, 53 FR 51268, Dec. 21, 1988]

§ 151.29 Expense of unloading and handling.

No expense incidental to the unloading, transporting, or handling of sugar, sirup, or molasses for convenient weighing, gaging, measuring, sampling, or marking shall be borne by the Government.

§ 151.30 Sugar closets.

Sugar closets for samples shall be substantially built and secured by

19 CFR Ch. I (4-1-08 Edition)

locks furnished by Customs. They shall be conveniently located as near as possible to the points of discharge they are intended to serve. They shall be provided by the owner of the premises on which they are located and shall be so situated that sugar, sirup, and molasses stored therein shall not be subjected to extremes of temperature or humidity.

§ 151.31 [Reserved]

Subpart C—Petroleum and Petroleum Products

§ 151.41 Information on entry summary.

On the entry summary for petroleum or petroleum products in bulk, the importer shall show the API gravity at 60° Fahrenheit, in accordance with the current edition of the ASTM-IP Petroleum Measurement Tables (American Edition), approved by the American Society for Testing and Materials. The appropriate unabridged table shall be used in the reduction of volume to 60° F. If the exact volumetric quantity cannot be determined in advance, the entry summary may be made for “__ barrels, more or less”, but in no case may the estimate vary by more than three percent from the gross quantity unladen. The term “barrels” is defined in Chapter 27, Additional U.S. Note 7, Harmonized Tariff Schedule of the United States. The information required by this section also shall be shown on the entry summary permit if the entry summary is filed at the time of entry, and on each entry summary continuation sheet regardless of when the entry summary is filed.

[T.D. 80-142, 45 FR 36384, May 30, 1980, as amended by T.D. 82-224, 47 FR 53728, Nov. 29, 1982; T.D. 89-1, 53 FR 51268, Dec. 21, 1988]

§ 151.42 Controls on unloading and gauging.

(a) *Methods of control.* (1) Each port director shall establish controls and checks on the unloading and measurement of petroleum and petroleum products imported in bulk by vessel, truck, railroad car, pipeline, or other carrier. One of the following methods of control shall be employed:
