

desires to commence or resume operations for the production of spirits. The notice shall be filed in accordance with the instructions on the form. The proprietor shall not commence or resume operations prior to the time specified in the notice.

(b) *Suspension of operations.* Any proprietor desiring to suspend production operations for a period of 90 days or more shall file notice on Form 5110.34 with the appropriate TTB officer specifying the date on which he will suspend operations. The notice shall be filed in accordance with instructions on the form. In case of an accident which makes it apparent that operations cannot be conducted for 90 days or more, the proprietor shall give immediate notice of suspension on Form 5110.34.

(Sec. 201, Pub. L. 85-859, 72 Stat. 1364, as amended (26 U.S.C. 5221))

§ 19.312 Receipt of materials.

The quantities of fermenting and distilling materials (including nonpotable chemical mixtures containing spirits produced in accordance with §19.67), and of spirits, denatured spirits, articles, and spirits residues, for redistillation, received on bonded premises shall be determined by the proprietor, and reported as provided in subpart W of this part. Fermented material (except apple cider exempt from tax under 26 U.S.C. 5042(a)(1)) to be used in the production of spirits shall be produced on the bonded premises where used or must be received on the premises from (a) a bonded wine cellar, in the case of wine, or (b) a contiguous brewery where produced, in the case of beer.

(Sec. 201, Pub. L. 85-859, 72 Stat. 1356, as amended, 1365, as amended (26 U.S.C. 5201, 5222, 5223))

§ 19.313 Use of materials in production of spirits.

The proprietor may produce spirits from any suitable material in accordance with statements of production procedure in his notice of registration. The distillation of nonpotable chemical mixtures received pursuant to application as provided in §19.67 shall be deemed to be the original and continuous distillation of the spirits in such mixtures and to constitute the production of spirits. Materials from which

alcohol will not be produced may be used in production only if the use of the materials is described in approved statements of production procedure.

(Sec. 201, Pub. L. 85-859, 72 Stat. 1349, as amended, 1353, as amended (26 U.S.C. 5172, 5178))

§ 19.314 Removal of fermenting material.

Material received for use as fermenting material may be removed from or used on bonded premises for other purposes. A record of use or removal shall be kept as provided in subpart W of this part.

(Sec. 201, Pub. L. 85-859, 72 Stat. 1356, as amended (26 U.S.C. 5201))

§ 19.315 Removal or destruction of distilling material.

Except as provided in this section, distilling material shall not be removed from bonded premises before being distilled. The proprietor may remove mash, wort, wash or other distilling material—(a) to plant premises, other than bonded premises for use in such businesses as may be authorized under §19.72; (b) to other premises for use in processes not involving the production of (1) spirits, (2) alcoholic beverages, or (3) vinegar by the vaporizing process; or (c) for destruction. The residue of distilling material not introduced into the production system may be removed from the premises if the liquid is expressed from the material before removal and such liquid is not received at any distilled spirits plant or bonded wine cellar. Residue of beer used as distilling material may be returned to the producing brewery. Distilling material produced and wine and beer received for use as distilling material may be destroyed. A record of removal or destruction shall be kept as provided in subpart W of this part.

(Sec. 201, Pub. L. 85-859, 72 Stat. 1365, as amended, 1381, as amended (26 U.S.C. 5222, 5370))

§ 19.316 Distillation.

The distillation of spirits shall be such that the spirits pass through a continuous system from the first still or other production equipment where access to the system would constitute

§ 19.317

a jeopardy to the revenue until the production of the spirits is completed. The distiller may, in the course of production, convey the product through as many distilling or other production operations as desired, provided the operations are continuous. Distilling operations are continuous when the spirits are conveyed through the various steps of production as expeditiously as plant operation will permit. The collection of unfinished spirits for the purpose of redistillation is not deemed to be a break in the continuity of the distilling procedure. However, the quantity and proof of any unfinished spirits produced from distilling materials, the quantity of which was ascertained in the manner authorized in §19.732(c) for such materials, shall be determined and recorded before any mingling with other materials or before any further operations involving the unfinished spirits outside the continuous system. Spirits may be held, prior to the production gauge, only for so long as is reasonably necessary to complete the production procedure.

(Sec. 201, Pub. L. 85-859, 72 Stat. 1353, as amended, 1362, as amended, 1365, as amended (26 U.S.C. 5178, 5211, 5222))

§ 19.317 Treatment during production.

Spirits may, in the course of original and continuous distillation, be purified or refined through, or by use of, any material which will not remain incorporated in the finished product. Juniper berries and other natural aromatics, or the extracted oils of such, may be used in the distillation of gin. Spirits may be percolated through or treated with oak chips which have not been treated with any chemical. Materials used in treatment of spirits, and which do not remain in the spirits, shall be destroyed or so treated as to preclude the extraction of potable spirits therefrom.

(Sec. 201, Pub. L. 85-859, 72 Stat. 1356, as amended (26 U.S.C. 5201))

§ 19.318 Addition of caramel to rum or brandy and addition of oak chips to spirits.

Caramel possessing no material sweetening properties may be added to rum or brandy on bonded premises prior to production gauge. Oak chips

27 CFR Ch. I (4-1-08 Edition)

which have not been treated with any chemical may be added to packages prior to or after production gauge; however, notation to that effect shall be made on the record of production gauge as provided in §19.319.

(Sec. 201, Pub. L. 85-859, 72 Stat. 1356, as amended (26 U.S.C. 5201))

§ 19.319 Production gauge.

(a) *General.* All spirits shall be gauged by determining quantity and proof within a reasonable time after production is completed. Except as otherwise specifically provided in this section, quantities may be determined by volume or by weight, by approved meter, or, when approved by the appropriate TTB officer, by other devices or methods which accurately determine the quantities. If caramel is added to brandy or rum, the proof of the spirits shall be determined after the addition. Spirits in each receiving tank shall be gauged before reduction in proof and both before and after each removal of spirits therefrom. The gauges shall be recorded by the proprietor in the records required by §19.736.

(b) *Tax to be determined on production gauge.* Tax may be determined on the basis of the production gauge if:

- (1) Spirits are weighed into bulk conveyances;
- (2) Spirits are uniformly filled by weight into metal packages; or
- (3) Spirits are filled by weight into packages for immediate withdrawal from bonded premises and the details of the gauge for each package are recorded on a package gauge record according to §19.769.

Transaction records shall be marked "Withdrawal on Production Gauge."

(c) *Tax not to be determined on production gauge.* If spirits are drawn from the production system into barrels, drums, or similar portable containers of the same rated capacity and the containers are filled to capacity, and the tax is not to be determined on the basis of the production gauge, the gauge may be made by:

- (1) Weighing in a tank, converting the weight into proof gallons, and determining the average content of each container; or
- (2) Measuring volumetrically, in a calibrated tank, converting the wine
