§ 26.262 Determination of tax on distilled spirits.

(a) If the certificate required by § 26.205 covers distilled spirits, and the distilled spirits are not being transferred under subparts O or Oa of this part, the tax imposed by 26 U.S.C. 7652 which provides for a tax equal to the tax imposed by 26 U.S.C. 5001 will be collected on each proof gallon, and fractional part thereof, contained in the shipment.

(b) A credit against the tax imposed on distilled spirits by 26 U.S.C. 7652 is allowable under 26 U.S.C. 5010 on each proof gallon of alcohol derived from eligible wine or from eligible flavors which do not exceed 2 ½ percent of the finished product on a proof gallon basis. The credit is allowable at the time the tax is payable as if it constituted a reduction in the rate of tax.

(c) Where credit against the tax is desired, the person liable for the tax shall establish an effective tax rate in accordance with § 26.262a. The effective tax rate established will be applied to each withdrawal or other disposition of the distilled spirits within the United States.

§ 26.262a Computation of effective tax rate.

(a) The proprietor shall compute the effective tax rate for distilled spirits containing eligible wine or eligible flavors as the ratio of the numerator and denominator as follows:

(1) The numerator will be the sum of:

(i) The proof gallons of all distilled spirits used in the product (exclusive of distilled spirits derived from eligible flavors), multiplied by the tax rate prescribed by 26 U.S.C. 5001;

(ii) The wine gallons of each eligible wine used in the product, multiplied by the tax rate prescribed by 26 U.S.C. 5041(b) (1), (2), or (3), as applicable; and

(iii) The proof gallons of all distilled spirits derived from eligible flavors used in the product, multiplied by the tax rate prescribed by 26 U.S.C. 5001, but only to the extent that such distilled spirits exceed 2½% of the denominator prescribed in paragraph (a)(2) of this section.

(2) The denominator will be the sum of:

(i) The proof gallons of all distilled spirits used in the product, including distilled spirits derived from eligible flavors; and

(ii) The wine gallons of each eligible wine used in the product, multiplied by twice the percentage of alcohol by volume of each, divided by 100.

(b) In determining the effective tax rate, quantities of distilled spirits, eligible wine, and eligible flavors will be expressed to the nearest tenth of a proof gallon. The effective tax rate may be rounded to as many decimal places as the proprietor deems appropriate, provided that, such rate is expressed no less exactly than the rate rounded to the nearest whole cent, and the effective tax rates for all products will be consistently expressed to the same number of decimal places. In such case, if the number is less than five it will be dropped; if it is five or over, a unit will be added.

(c) The following is an example of the use of the formula.

¹ Proof gallons by which distilled spirits derived from eligible flavors exceed 2½% of the total proof gallons in the batch (100.9 - (2½%)×3,371.8=16.6).
