

§ 2902.10

(iv) A maximum of 20 points will be awarded a proposal based on the product's prospective competitiveness in the market place;

(v) A maximum of 10 points will be awarded a proposal based on its likely benefit to the environment.

(3) Cost-sharing proposals will be considered first for high priority products of small and emerging private business enterprises. If funds remain to support further testing, USDA will consider cost sharing proposals for products of all other producers of biobased items as well as the remaining proposals for products of small and emerging private business enterprises. Proposals will be selected based on priority rating until available funds for the fiscal year are committed.

(4)(i) For products selected for life cycle costs and environmental and health benefits testing under this paragraph, USDA could provide up to 50 percent of the cost of determining the life cycle costs and environmental and health effects, up to a maximum of \$5,000 of assistance per product.

(ii) For products selected for performance testing under this paragraph, USDA could provide up to 50 percent of the cost for performance testing, up to \$100,000 of assistance per product for up to two performance tests (measures of performance) per product.

(5) For selected proposals, USDA will enter into agreements with and provide the funds directly to the testing entities.

(6) Proposals submitted in one fiscal year, but not selected for cost sharing of testing in that year, may be resubmitted to be considered for cost sharing in the following year.

Subpart B—Designated Items

SOURCE: 71 FR 13705, Mar. 16, 2006, unless otherwise noted.

§ 2902.10 Mobile equipment hydraulic fluids.

(a) *Definition.* Hydraulic fluids formulated for general use in non-stationary equipment, such as tractors, end loaders, or backhoes.

(b) *Minimum biobased content.* The minimum biobased content is 44 percent and shall be based on the amount

7 CFR Ch. XXIX (1–1–08 Edition)

of qualifying biobased carbon in the product as a percent of the weight (mass) of the total organic carbon in the finished product.

(c) *Preference effective date.* No later than March 16, 2007, procuring agencies, in accordance with this part, will give a procurement preference for qualifying biobased mobile equipment hydraulic fluids. By that date, Federal agencies that have the responsibility for drafting or reviewing specifications for items to be procured shall ensure that the relevant specifications require the use of biobased mobile equipment hydraulic fluids.

(d) *Determining overlap with an EPA-designated recovered content product.* Qualifying biobased products that fall under this item may, in some cases, overlap with the following EPA-designated recovered content product: Re-refined Lubricating Oils. USDA is requesting that manufacturers of these qualifying biobased products provide information on the USDA Web site of qualifying biobased products about the intended uses of the product, whether or not the product contains petroleum-based ingredients, re-refined oil, and/or any other recovered material, and performance standards against which the product has been tested. This information will assist Federal agencies in determining whether or not a qualifying biobased product overlaps with EPA-designated lubricating oils containing re-refined oil and which product should be afforded the preference in purchasing.

(e) *Exemptions.* The following applications are exempt for the preferred procurement requirement for this item:

(1) Military equipment: Product or system designed or procured for combat or combat-related missions.

(2) Spacecraft systems and launch support equipment.

§ 2902.11 Roof coatings.

(a) *Definition.* Coatings formulated for use in commercial roof deck systems to provide a single-coat monolith coating system.

(b) *Minimum biobased content.* The minimum biobased content is 20 percent and shall be based on the entire product.
