

the truck or container is opened. Once sealed, the refrigerated truck or refrigerated container must remain unopened until it reaches the port of first arrival in the United States.

(ix) Any avocados that have not been packed or loaded into a refrigerated truck or refrigerated container by the end of the workday must be kept in the screened packing area.

(d) *Certification.* All consignments of avocados must be accompanied by a phytosanitary certificate issued by the Mexican NPPO with an additional declaration certifying that the conditions specified in this section have been met.

(e) *Pest detection.* (1) If any of the avocado seed pests *Heilipus lauri*, *Conotrachelus aguacatae*, *C. perseae*, or *Stenomoma catenifer* are discovered in a municipality during the semiannual pest surveys, orchard surveys, packinghouse inspections, or other monitoring or inspection activity in the municipality, the Mexican NPPO must immediately initiate an investigation and take measures to isolate and eradicate the pests. The Mexican NPPO must also provide APHIS with information regarding the circumstances of the infestation and the pest risk mitigation measures taken. The municipality in which the pests are discovered will lose its pest-free certification and avocado exports from that municipality will be suspended until APHIS and the Mexican NPPO agree that the pest eradication measures taken have been effective and that the pest risk within that municipality has been eliminated.

(2) If the Mexican NPPO discovers the stem weevil *Copturus aguacatae* in an orchard during an orchard survey or other monitoring or inspection activity in the orchard, the Mexican NPPO must provide APHIS with information regarding the circumstances of the infestation and the pest risk mitigation measures taken. The orchard in which the pest was found will lose its export certification immediately and avocado exports from that orchard will be suspended until APHIS and the Mexican NPPO agree that the pest eradication measures taken have been effective and that the pest risk within that orchard has been eliminated.

(3) If the Mexican NPPO discovers the stem weevil *Copturus aguacatae* in

fruit at a packinghouse, the Mexican NPPO must investigate the origin of the infested fruit and provide APHIS with information regarding the circumstances of the infestation and the pest risk mitigation measures taken. The orchard where the infested fruit originated will lose its export certification immediately and avocado exports from that orchard will be suspended until APHIS and the Mexican NPPO agree that the pest eradication measures taken have been effective and that the pest risk within that orchard has been eliminated.

(f) *Ports.* The avocados may enter the United States only through a port of entry located in a State where the distribution of the fruit is authorized pursuant to paragraph (a)(2) of this section.

(g) *Inspection.* The avocados are subject to inspection by an inspector at the port of first arrival. At the port of first arrival, an inspector will sample and cut avocados from each consignment to detect pest infestation.

(h) *Inspection.* The avocados are subject to inspection by an inspector at the port of first arrival, at any stops in the United States en route to an approved State, and upon arrival at the terminal market in the approved States. At the port of first arrival, an inspector will sample and cut avocados from each consignment to detect pest infestation.

(i) *Repackaging.* If any avocados are removed from their original shipping boxes and repackaged, the stickers required by paragraph (c)(3)(vi) of this section may not be removed or obscured and the new boxes must be clearly marked with all the information required by paragraph (c)(3)(vii) of this section.

§ 319.56–31 Peppers from Spain.

Peppers (fruit) (*Capsicum* spp.) may be imported into the United States from Spain only under permit, and only in accordance with this section and all other applicable requirements of this subpart:

(a) The peppers must be grown in the Alicante or Almeria Province of Spain in pest-proof greenhouses registered with, and inspected by, the Spanish

§ 319.56-32

Ministry of Agriculture, Fisheries, and Food (MAFF);

(b) The peppers may be shipped only from December 1 through April 30, inclusive;

(c) Beginning October 1, and continuing through April 30, MAFF must set and maintain Mediterranean fruit fly (*Ceratitis capitata*) (Medfly) traps baited with trimedlure inside the greenhouses at a rate of four traps per hectare. In all outside areas, including urban and residential areas, within 8 kilometers of the greenhouses, MAFF must set and maintain Medfly traps baited with trimedlure at a rate of four traps per square kilometer. All traps must be checked every 7 days;

(d) Capture of a single Medfly in a registered greenhouse will immediately halt exports from that greenhouse until the Administrator determines that the source of infestation has been identified, that all Medflies have been eradicated, and that measures have been taken to preclude any future infestation. Capture of a single Medfly within 2 kilometers of a registered greenhouse will necessitate increased trap density in order to determine whether there is a reproducing population in the area. Capture of two Medflies within 2 kilometers of a registered greenhouse during a 1-month period will halt exports from all registered greenhouses within 2 kilometers of the capture, until the source of infestation is determined and all Medflies are eradicated;

(e) The peppers must be safeguarded from harvest to export by insect-proof mesh or plastic tarpaulin, including while in transit to the packinghouse and while awaiting packing. They must be packed in insect-proof cartons or covered by insect-proof mesh or plastic tarpaulin for transit to the airport and subsequent export to the United States. These safeguards must be intact upon arrival in the United States;

(f) The peppers must be packed for shipment within 24 hours of harvest;

(g) During shipment, the peppers may not transit other fruit fly-supporting areas unless shipping containers are sealed by MAFF with an official seal whose number is noted on the phytosanitary certificate; and

7 CFR Ch. III (1-1-08 Edition)

(h) A phytosanitary certificate issued by MAFF and bearing the declaration, "These peppers were grown in registered greenhouses in Alicante or Almeria Province in Spain," must accompany the consignment.

(Approved by the Office of Management and Budget under control number 0579-0210)

§ 319.56-32 Peppers from New Zealand.

Peppers (fruit) (*Capsicum* spp.) from New Zealand may be imported into the United States only in accordance with this section and all other applicable provisions of this subpart.

(a) The peppers must be grown in New Zealand in insect-proof greenhouses approved by the New Zealand Ministry of Agriculture and Forestry (MAF).

(b) The greenhouses must be equipped with double self-closing doors, and any vents or openings in the greenhouses (other than the double self-closing doors) must be covered with 0.6 mm screening in order to prevent the entry of pests into the greenhouse.

(c) The greenhouses must be examined periodically by MAF to ensure that the screens are intact.

(d) Each consignment of peppers must be accompanied by a phytosanitary certificate of inspection issued by MAF bearing the following declaration: "These peppers were grown in greenhouses in accordance with the conditions in § 319.56-32."

§ 319.56-33 Mangoes from the Philippines.

Mangoes (fruit) (*Mangifera indica*) may be imported into the United States from the Philippines only in accordance with this section and other applicable provisions of this subpart.

(a) *Limitation of origin.* The mangoes must have been grown on the island of Guimaras, which the Administrator has determined meets the criteria set forth in § 319.56-5 with regard to the mango seed weevil (*Sternonchetus mangiferae*). Mangoes from all other areas of the Philippines except Palawan are eligible for importation into Hawaii and Guam only. Mangoes from Palawan are not eligible for importation into the United States.
