

§ 3300.46

made concerning the application, observe a test at the laboratory of a mechanical refrigerating appliance for a Class "C" mechanically refrigerated container or trailer, with Class "C" as defined in ATP, Annex 1, paragraph 3.

(f) A statement that the laboratory will maintain records of basic data developed in each test conducted under this rule, such records to be available for review by the ATP manager or other representative of the Administrator, upon request. The record for each test shall be maintained for a period of three years.

(g) A statement that the organization will advise the ATP manager as soon as practicable of its intent to conduct a test under this rule and that it will, as soon as possible, advise when a firm test has been set so that the ATP manager or other representative of the Administrator may observe the test.

(h) A statement that the organization will send to the ATP manager a copy of each test report for an appliance tested at the laboratory according to this rule, within 30 days after completion of the test.

(i) A statement that, should any significant change occur in the facility with respect to structure or test equipment as a result of redesign or other cause during the period of approval, the organization will so advise the ATP manager within 30 days after such change.

(j) Any other pertinent information.

§ 3300.46 Response to application for approval.

The Administrator will, within 30 days of receipt of an application and any relevant information required, advise the applicant whether or not the facility is approved as a testing laboratory. Approval is for a 5-year period from date of approval.

§ 3300.49 Application for renewal of approval.

If an organization wishes to have an approval renewed at the end of a 5-year period, it shall submit a request for renewal to the Administrator 90 days before expiration of the existing approval. The request for renewal shall contain the same type of information as required in the original application,

7 CFR Ch. XXXIII (1-1-08 Edition)

that is, the information called for in § 3300.43 of subpart E.

§ 3300.52 Response to application for renewal of approval.

The Administrator will, within 30 days of receipt of application and any relevant information required, advise the applicant whether or not approval is renewed. A renewal extends the period of approval for 5 years.

§ 3300.55 Termination of approval.

An approved testing laboratory may at any time withdraw as an approved testing laboratory by written notice to the Administrator. Similarly, the Administrator may suspend or terminate for cause the approved status of a testing laboratory by written notice to the organization, setting forth the reasons for such action. Examples of causes for suspension or termination of approval would be a change in equipment or operations at the laboratory which would render it incapable of performing tests according to the standards in the ATP, or noncompliance of the laboratory with pertinent portions of this rule.

Subpart F—Certification of New Equipment

§ 3300.58 General.

The following shall apply for certification of new equipment:

(a) Domestic owners are eligible to receive U.S. ATP certificates for equipment produced or assembled in the United States or in a foreign country.

(b) Foreign owners are eligible to receive U.S. ATP certificates only for equipment produced or assembled in the United States.

(c) For equipment manufactured (i.e., produced or assembled) in the United States:

(1) When the complete unit of equipment is tested, the test shall be performed in a U.S. ATP testing station.

(2) When the mechanical refrigerating appliance and the insulated body are tested separately, such tests shall be performed in approved testing facilities in the United States or in test facilities located in, and approved by, a foreign country which is a Contracting Party.

(d) For equipment manufactured in a foreign country which is a Contracting Party, a domestic owner may receive a U.S. ATP certificate in exchange for the Foreign-ATP certificate issued by the country of manufacture.

(e) For equipment manufactured in a foreign country which is not a Contracting Party, tests shall be performed in approved testing facilities in the United States or in facilities located in and approved by a foreign country which is a Contracting Party.

(f) In accordance with ATP, Annex 1, Appendix 1, paragraphs 2(a) and (d), the validity of a test report for a reference equipment shall expire at the end of a period of 3 years or at the end of the manufacture of 1,000 units of serially-produced equipment, whichever occurs first.

(g) The validity of a test report for a reference mechanical refrigerating appliance shall expire at the end of a period of three years, or at the end of the manufacture of 1,000 identical mechanical refrigerating appliances, whichever occurs first.

(h) The validity of a test report for a reference insulated body shall expire at the end of a period of three years, or at the end of the manufacture of 1,000 serially-produced bodies, whichever occurs first.

(i) Serially-produced equipment shall be produced or assembled by the same manufacturer and at the same manufacturing plant as the reference equipment.

(j) Identical mechanical refrigerating appliances shall be manufactured by the same manufacturer and at the same manufacturing plant as the reference mechanical refrigerating appliance.

(k) Serially-produced bodies shall be manufactured by the same manufacturer and at the same manufacturing plant as the reference insulated body.

(l) Equipment manufacturers shall notify the ATP manager 30 days before start of manufacture so that the ATP manager or other representative of the Administrator may observe the manufacturing operation.

(m) Owners who receive a U.S. ATP certificate have the responsibility to maintain the equipment in good repair and operating condition with the un-

derstanding that the certificate is valid only so long as:

(1) The insulated body and the thermal appliance are maintained in good condition;

(2) No material alteration is made to the thermal appliance which decreases its refrigerating capacity, and;

(3) If the thermal appliance is replaced, it is replaced by an appliance of equal or greater refrigerating capacity.

§3300.61 Testing and verification requirements.

In accordance with ATP, Annex 1, Appendix 1, paragraphs 1, 1(a), 2(a), 2(b), 2(c) and 3, and Appendix 2, paragraph 41, certification of new equipment is based upon the following:

(a) For a unit of equipment, a test of the equipment in an approved testing station.

(b) For serially-produced equipment:

(1) A test of one unit of equipment in an approved testing station, such unit to serve as the reference equipment.

(2) Verification that production of other units of equipment is in conformity with the reference equipment.

(c) For mechanically refrigerated equipment, certification may be based upon a separate test of the mechanical refrigerating appliance and a separate test of the insulated body.

§3300.64 Application for certificate for new equipment produced or assembled in the United States or in a foreign country which is not a contracting party to the ATP.

Application for certification shall be submitted to the ATP manager by an officer in the organization of the owner of the equipment. In the case of equipment manufactured in the United States, application may be made by an officer in the organization of the equipment manufacturer, acting on behalf of the owner. Copies of the Form, Application for U.S. ATP Certificate for New Equipment Produced or Assembled in the United States or in a Foreign Country Which is not a Contracting Party to the ATP, may be obtained by a request to the ATP manager. The following information must be supplied in the application:

(a) A statement whether the owner is a domestic owner or a foreign owner, with the name, address and telephone
