

the Northern Potato Crop Provisions, certified seed units will be established in accordance with the unit division provisions contained in the Basic Provisions and the Northern Potato Crop Provisions. For example, if a basic unit is divided into two optional units for potato acreage covered under the Basic Provisions and the Northern Potato Crop Provisions, but certified seed is grown in only one of those optional units, the certified seed acreage will be insured as one basic unit.

10. Failure to meet any requirements for seed to be used to produce a subsequent seed crop will not be covered. All the production that meets requirements for certified seed used to produce a commercial crop will be included in production to count.

[62 FR 65337, Dec. 12, 1997, as amended at 64 FR 71271, Dec. 21, 1999; 72 FR 61286, Oct. 30, 2007]

§ 457.146 Northern potato crop insurance—storage coverage endorsement.

The Northern Potato Crop Insurance Storage Coverage Endorsement Provisions for the 2008 and succeeding crop years are as follows:

FCIC Policies

UNITED STATES DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Reinsured Policies

(Appropriate title for insurance provider)

Both FCIC and reinsured policies:

Northern Potato Crop Insurance Storage Coverage Endorsement

1. In return for payment of the required additional premium as contained in the actuarial documents, this endorsement is attached to and made part of your Northern Potato Crop Provisions subject to the terms and conditions described herein. In the event of a conflict between the Northern Potato Crop Provisions and this endorsement, this endorsement will control.

2. You must elect this endorsement on or before the sales closing date for the initial crop year in which you wish to insure your potatoes under this endorsement. This endorsement will continue in effect until canceled. It may be canceled by either you or us for any succeeding crop year by giving written notice to the other party on or before the cancellation date.

3. Potato production grown under a contract that requires the production to be delivered to a buyer within three days of harvest will not be insured under this endorsement. When such contract requires delivery of a stated amount of production, rather

than all of the production from a stated amount of acres, the number of acres not insured under this endorsement will be determined by dividing the stated amount of production by the approved yield for the acreage. All other potato production insured under the Northern Potato Crop Provisions must be insured under this endorsement unless the Special Provisions allow you to exclude certain potato varieties, types, or groups from this endorsement, and you elect to exercise this option. If you elect this endorsement, such exclusions must be shown annually on your acreage report and will be applicable to all acreage of the excluded varieties, types, or groups for the crop year.

4. When production from separate insurance units, basic or optional, is commingled in storage, the production to count for each unit will be allocated pro rata based on the production placed in storage from each unit. Such allocation will be allowed only if verifiable records of production placed in storage are available by unit. If you do not have verifiable records, all units without verifiable records will be combined in accordance with section 11 of the Northern Potato Crop Provisions. For example, if 500 hundredweight from one unit are commingled with 1,500 hundredweight from another unit and the production to count from the stored production is 1,000 hundredweight, 250 hundredweight of production to count will be allocated to the unit contributing 500 hundredweight and 750 hundredweight to the unit contributing 1500 hundredweight to the stored production. This provision does not eliminate or change any other requirement contained in this policy to provide or maintain separate records of acreage or production by unit.

5. In lieu of section 9(b)(1) of the Northern Potato Crop Provisions, the extended coverage provided by this endorsement will be applicable but only if:

(a) Insured potatoes are damaged within the insurance period by an insured cause other than freeze that later results in:

(1) Tuber rot as defined in the Northern Potato Crop Provisions, to the extent that 5.1 percent (by weight) or more of the insured production is affected;

(2) Internal defects to the extent that such defects are in excess of the amount allowed for the U.S. grade standard you elected for purposes of coverage under the Northern Potato Crop Insurance Quality Endorsement. Such defects must not be separable from undamaged production using methods used by the packers or processors to which you normally deliver your potato production. This coverage is applicable only to production covered under the Northern Potato Crop Insurance Quality Endorsement; or

(3) The potatoes damaged by an insurance cause of loss fail to meet any of the following standards or a less stringent standard

for the same quality factors specified below, contained in the processor contract, if applicable, (this coverage is applicable only to production covered under the Northern Potato Processing Quality Endorsement):

(i) A specific gravity lower than 1.074;
 (ii) A fry color of No. 3 or darker due to either sugar exceeding 10 percent or sugar ends exceeding 19 percent; or

(iii) An Agrtron rating lower than 58.

(b) You notify us within 72 hours of your initial discovery of any damage that has or that may later result in the quality deficiencies specified in section 5(a);

(c) The percentage of production with any of the quality deficiencies specified in section 5(a) is determined based on samples obtained no later than 60 days after the end of the insurance period and the potatoes are evaluated and quality (grade) determinations are made by us, a laboratory approved by us, a potato grader licensed or certified by the applicable State or the United States Department of Agriculture, or us, in accordance with the United States Standards for Grades of Potatoes:

(1) Samples of damaged production must be obtained by us or a party approved by us prior to the sale or disposal of any lot of potatoes; and

(2) If production is not sold or disposed of within 60 days after the end of the insurance period, samples must be obtained within 60 days after the end of the insurance period and a quality (grade) determination must be completed within 21 days of sampling.

[62 FR 65337, Dec. 12, 1997, as amended at 72 FR 61286, Oct. 30, 2007]

§ 457.147 Central and Southern potato crop insurance provisions.

The Central and Southern Potato Crop Insurance Provisions for the 2009 and succeeding crop years are as follows:

FCIC Policies

UNITED STATES DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Reinsured Policies

(Appropriate title for insurance provider)

Both FCIC and reinsured policies:

Central and Southern Potato Crop Provisions

These provisions will be applicable in Alabama; Arizona; all California counties except Humboldt, Modoc, and Siskiyou; Delaware; Florida; Georgia; Maryland; Missouri; New Jersey; all New Mexico counties except San Juan; North Carolina; Oklahoma; Texas; and Virginia; and other states or counties if allowed by the Special Provisions.

1. Definitions

Certified seed. Potatoes that were entered into the potato certified seed program and that meet all requirements for production to be used to produce a seed crop for the next crop year or a potato crop for harvest for commercial uses in the next crop year.

Discard. Disposal of production by you, or a person acting for you, without receiving any value for it.

Disposed. Any disposition of the crop including but not limited to sale or discard.

Grade inspection. An inspection in which samples of production are obtained by us, or a party approved by us, prior to the sale, storage, or disposal of any lot of potatoes, or any portion of a lot and the potatoes are evaluated and quality (grade) determinations are made by us, a laboratory approved by us, or a potato grader licensed or certified by the applicable State or the United States Department of Agriculture, in accordance with the United States Standards for Grades of Potatoes. The United States standards used to determine the quality (grade) deficiencies will be: For potatoes produced for chipping, the United States Standards for Grades of Potatoes for Chipping; for potatoes produced for processing, the United States Standards for Grades of Potatoes for Processing; for potatoes produced for seed, the United States Standards for Grades of Seed Potatoes; and for all other potatoes, the United States Standards for Grades of Potatoes. The quantity and number of samples required will be determined in accordance with procedure issued by FCIC.

Harvest. Lifting potatoes from within the soil to the soil surface.

Hundredweight. One hundred (100) pounds avoirdupois.

Lot. A quantity of production that can be separated from other quantities of production by grade characteristics, load, location or other distinctive features.

Planting period. The period of time between the calendar dates designated in the Special Provisions for the planting of spring-planted, summer-planted, fall-planted, or winter-planted potatoes.

Potato certified seed program. The state program administered by a public agency responsible for the seed certification process within the state in which the seed is produced.

Practical to replant. In lieu of the definition of "Practical to replant" contained in section one of the Basic Provisions, practical to replant is defined as our determination, after loss or damage to the insured crop, based on factors including, but not limited to, moisture availability, condition of the field, marketing windows, and time to crop maturity, that replanting to the insured crop will allow the crop to attain maturity prior to
