

fumigating such raisins at the rate of \$2.30 per ton per month, or any part thereof, between September 13 and October 31, 2003, and at the rate of \$1.18 per ton per month, or any part thereof, between November 1, 2003, and July 31, 2004. Such services shall be completed so that the Committee is assured that the raisins are maintained in good condition.

(c) *Payment of rental on boxes and bins containing raisins held beyond the crop year of acquisition.* Payment of rental on boxes and bins containing reserve tonnage raisins held beyond the crop year of acquisition shall be made in accordance with this paragraph. Each handler, producer, dehydrator, and other person who furnishes boxes or bins in which such raisins are held for the account of the Committee on August 1, shall be compensated for the use of such boxes and bins: *Provided*, That persons holding 2002–03 Natural (sun-dried) Seedless reserve raisins on September 13, 2003, that are intended for use as cattle feed shall be compensated for the use of such boxes and bins, and that no compensation shall be accrued for such raisins held between August 1 and September 12, 2003. The rate of compensation shall be: For boxes, two and one-half cents per day, not to exceed a total payment of \$1 per box per year, per average net weight of raisins in a sweatbox, with equivalent rates for raisins in boxes other than sweatboxes; and for bins 20 cents per day per bin, not to exceed a total of \$10 per bin per year. For purposes of this paragraph, *box* means any container with a capacity of less than 1,000 pounds, and *bin* means any container with a capacity of 1,000 pounds or more. The average net weight of raisins in each type of box shall be the industry average as computed by the Committee for the box in which the raisins are so held. No further compensation shall be paid unless the raisins are so held in the boxes on the succeeding August 1.

(d) *Payment for other services—(1) General.* In addition to the payments provided in paragraphs (a), (b), and (c) of this section, handlers shall be compensated for other services performed with respect to reserve tonnage raisins as set forth in this paragraph.

(2) *Transportation.* The Committee may arrange with any handler for transporting reserve tonnage raisins. Payment for such transportation shall be based on then prevailing haulage rates within the production area for the type of transportation required.

(3) *Packing.* A handler who accepts an offer by the Committee to pack reserve tonnage raisins for its account shall be compensated for such packing in an amount determined by or acceptable to the Committee. In considering the amount of compensation to be paid, the Committee shall take into account, among other factors, the particular varietal type of raisins to be packed, the particular pack or package required, and the quantity and quality of the raisins to be packed.

(4) *Redelivery.* In the event the Committee removes reserve tonnage raisins of a previous crop year from a handler upon the request provided for in § 989.66(f) and such handler subsequently desires redelivery to him of reserve tonnage raisins for contract packing, or other purpose, he shall reimburse the Committee in advance of such redelivery for the net costs to it of the removal, storage, and redelivery of such raisins: *Provided*, That the Committee may waive payment by the handler of part or all of such costs if it determines that such waiver is reasonably necessary to the prompt and favorable disposition of the raisins involved.

Subpart—Conversion Factors

§ 989.601 Conversion factors for raisin weight.

The following factors for the named varietal types of raisins shall be used to convert the net weight of reconditioned raisins acquired by handlers as packed raisins to natural condition weight. The net weight of the raisins after the completion of processing shall be divided by the applicable factor to obtain the natural condition weight: *Provided*, That the adjusted weight does not exceed the original

weight of the raisins prior to reconditioning; and *Provided further*, That, if the adjusted weight exceeds the original weight, the original weight will be used.

Varietal type	Conversion factor
Natural (sun-dried) Seedless	0.92
Golden Seedless, Dipped Seedless, Other Seedless, and Other Seedless-Sulfured	0.95
Muscats (including raisins with seeds):	
Seeded	0.80
Unseeded	0.92
Sultana	0.92
Zante Currant	0.91

[54 FR 41587, Oct. 11, 1989, as amended at 67 FR 36792, May 28, 2002; 68 FR 42947, July 21, 2003]

Subpart—Quality Control

§ 989.701 Minimum grade and condition standards for natural condition raisins.

Effective pursuant to §989.58, raisins meeting the varietal standards herein-after set forth shall be considered as standard raisins and those failing to meet such standards shall be considered as off-grade raisins. Where the raisins in any lot consist of two or more varietal types commingled within their containers, the lot shall be considered as a mixed lot and as standard raisins if they meet for each defect the most restrictive requirements for the varietal types of raisins comprising the lot. In the event layered Muscats (including other raisins with seeds) or Cluster Seedless raisins are commingled within their containers with loose Muscats (including other raisins with seeds) or loose Cluster Seedless raisins respectively, the entire lot shall be considered as loose Muscats (including other raisins with seeds) or Natural (sun-dried) Seedless raisins. The raisins shall be considered as standard raisins if the lot as a whole meets the minimum standards for loose Muscats (including other raisins with seeds) or Natural (sun-dried) Seedless raisins: *Provided*, That with respect to the requirements peculiar to a varietal type such as possessing characteristic color, flavor, or odor, the raisins shall be considered as meeting such requirements if they have been properly prepared as

raisins. In each category, only those raisins which have been properly dried and cured in original natural condition, are free from active infestation, and are in such condition that they are capable of being received, stored, and packed without undue deterioration or spoilage, shall be considered as storable raisins.

(a) *Natural (sun-dried) Seedless, Monukka and Other Seedless raisins.* Natural condition Natural (sun-dried) Seedless, Monukka and Other Seedless raisins shall have been prepared from sound, wholesome, matured grapes properly dried and cured, and shall meet the following additional requirements: (1) Shall be fairly free from damage by sugaring, mechanical injury, sunburn, or other similar injury; (2) shall have a normal characteristic color, flavor, and odor of properly prepared raisins; (3) shall contain not more than 5 percent, by weight, of sub-standard raisins (raisins that show development less than that characteristic of raisins prepared from fairly well-matured grapes), and shall also contain at least 50 percent well-matured or reasonably well-matured raisins; (4) shall not exceed 16 percent moisture as determined by the dried fruit moisture tester method, except that there shall be no maximum moisture content for Cluster Seedless raisins; and (5) shall be of such quality and condition as can be expected to withstand storage as provided in the order and that when processed in accordance with good commercial practice will meet the minimum standards for processed raisins established by the Committee, and that with respect to Cluster Seedless raisins, in addition to the above requirements the raisins shall be fairly free from shattered (or loose end) berries, and be uniformly cured; shall contain 30 percent or more “2 Crown” or larger size berries; and shall be of such quality and condition that when processed in accordance with good commercial practice will, except for moisture content, meet the minimum standards for processed raisins established by the Committee.
