

(d) *Form of copyright deposit.* If full term retention is granted, the Copyright Office will retain under its control the particular copyright deposit used to make registration for the work. Any deposit made on or after September 19, 1978, shall satisfy the requirements of §§ 202.20 and 202.21.

(e) *Fee for full term retention.* (1) Pursuant to section 708(a)(11) of title 17 of the United States Code, the Register of Copyrights has fixed the fee for full term retention, as prescribed in § 201.3(d), for each copyright deposit granted full term retention.

(2) A check or money order in the amount prescribed in § 201.3(d) payable to the Register of Copyrights, must be received in the Copyright Office within 60 calendar days from the date of mailing of the Copyright Office's notification to the requestor that full term retention has been granted for a particular copyright deposit.

(3) The Copyright Office will issue a receipt acknowledging payment of the fee and identifying the copyright deposit for which full term retention has been granted.

(f) *Selection by Library of Congress—(1) General.* All published copyright deposits are available for selection by the Library of Congress until the Copyright Office has formally granted a request for full term retention. Unless the requestor has deposited the additional copy or phonorecord specified by paragraph (c)(2) of this section, the Copyright Office will not process a request for full term retention submitted concurrent with a copyright registration application and deposit, until the Library of Congress has had a reasonable amount of time to make its selection determination.

(2) A request for full term retention made at the time of deposit of a published work does not affect the right of the Library to select one or both of the copyright deposits.

(3) If one copyright deposit is selected, the second deposit, if any, will be used for full term retention.

(4) If both copyright deposits are selected, or, in the case where the single deposit made is selected, full term retention will be granted only if the additional copy or phonorecord specified by paragraph (c)(2) was deposited.

(g) *Termination of full term storage.* Full term storage will cease 75 years after the date of publication of the work identified by the copyright deposit retained, and the copyright deposit will be disposed of in accordance with section 704, paragraphs (b) through (d), of title 17 of the United States Code.

#### APPENDIX A TO PART 202—TECHNICAL GUIDELINES REGARDING SOUND PHYSICAL CONDITION

To be considered a copy "of sound physical condition" within the meaning of 37 CFR 202.22(d)(5), a copy shall conform to all the technical guidelines set out in this Appendix.

A. *Physical Condition.* All portions of the copy that reproduce the transmission program must be:

1. *Clean:* Free from dirt, marks, spots, fungus, or other smudges, blotches, blemishes, or distortions;

2. *Undamaged:* Free from burns, blisters, tears, cuts, scratches, breaks, erasure, or other physical damage. The copies must also be free from:

(i) Any damage that interferes with performance from the tape or other reproduction, including physical damage resulting from earlier mechanical difficulties such as cassette jamming, breaks, tangles, or tape overflow; and

(ii) Any erasures, damage causing visual or audible defects or distortions or any material remaining from incomplete erasure of previously recorded works.

3. *Unspliced:* Free from splices in any part of the copy reproducing the transmission program, regardless of whether the splice involves the addition or deletion of material or is intended to repair a break or cut.

4. *Undeteriorated:* Free from any visual or aural deterioration resulting from aging or exposure to climatic, atmospheric, or other chemical or physical conditions, including heat, cold, humidity, electromagnetic fields, or radiation. The copy shall also be free from excessive brittleness or stretching, from any visible flaking of oxide from the tape base or other medium, and from other visible signs of physical deterioration or excessive wear.

B. *Physical Appurtenances of Deposit Copy.*

1. *Physical Housing of Video Tape Copy.* (a) In the case of video tape reproduced for reel-to-reel performance, the deposit copy shall consist of reels of uniform size and length. The length of the reels will depend on both the size of the tape and its running time (the

last reel may be shorter). (b) In the case of video tape reproduced for cassette, cartridge, or similar performance, the tape drive mechanism shall be fully operable and free from any mechanical defects.

2. *“Leader” or Equivalent.* The copy, whether housed in reels, cassettes, or cartridges, shall have a leader segment both preceding the beginning and following the end of the recording.

C. *Visual and Aural Quality of Copy:*

1. *Visual Quality.* The copy should be equivalent to an evaluated first generation copy from an edited master tape and must reproduce a flawless and consistent electronic signal that meets industry standards for television screening.

2. *Aural Quality.* The sound channels or other portions must reproduce a flawless and consistent electronic signal without any audible defects.

(17 U.S.C. 407, 408, 702)

APPENDIX B TO PART 202—“BEST EDITION” OF PUBLISHED COPYRIGHTED WORKS FOR THE COLLECTIONS OF THE LIBRARY OF CONGRESS

The copyright law (title 17, United States Code) requires that copies or phonorecords deposited in the Copyright Office be of the “best edition” of the work. The law states that “The ‘best edition’ of a work is the edition, published in the United States at any time before the date of deposit, that the Library of Congress determines to be most suitable for its purposes.” (For works first published only in a country other than the United States, the law requires the deposit of the best edition as first published.)

When two or more editions of the same version of a work have been published, the one of the highest quality is generally considered to be the best edition. In judging quality, the Library of Congress will adhere to the criteria set forth below in all but exceptional circumstances.

Where differences between editions represent variations in copyrightable content, each edition is a separate version and “best edition” standards based on such differences do not apply. Each such version is a separate work for the purpose of the copyright law.

The criteria to be applied in determining the best edition of each of several types of material are listed below in descending order of importance. In deciding between two editions, a criterion-by-criterion comparison should be made. The edition which first fails to satisfy a criterion is to be considered of inferior quality and will not be an acceptable deposit. Example: If a comparison is made between two hardbound editions of a book, one a trade edition printed on acid-free

paper, and the other a specially bound edition printed on average paper, the former will be the best edition because the type of paper is a more important criterion than the binding.

Under regulations of the Copyright Office, potential depositors may request authorization to deposit copies or phonorecords of other than the best edition of a specific work (e.g., a microform rather than a printed edition of a serial), by requesting “special relief” from the deposit requirements. All requests for special relief should be in writing and should state the reason(s) why the applicant cannot send the required deposit and what the applicant wishes to submit instead of the required deposit.

I. *Printed Textual Matter*

A. *Paper, Binding, and Packaging:*

1. Archival-quality rather than less-permanent paper.
2. Hard cover rather than soft cover.
3. Library binding rather than commercial binding.
4. Trade edition rather than book club edition.
5. Sewn rather than glue-only binding.
6. Sewn or glued rather than stapled or spiral-bound.
7. Stapled rather than spiral-bound or plastic-bound.
8. Bound rather than looseleaf, except when future looseleaf insertions are to be issued. In the case of looseleaf materials, this includes the submission of all binders and indexes when they are part of the unit as published and offered for sale or distribution. Additionally, the regular and timely receipt of all appropriate looseleaf updates, supplements, and releases including supplemental binders issued to handle these expanded versions, is part of the requirement to properly maintain these publications.
9. Slip-cased rather than non-slip-cased.
10. With protective folders rather than without (for broadsides).
11. Rolled rather than folded (for broadsides).
12. With protective coatings rather than without (except broadsides, which should not be coated).

B. *Rarity:*

1. Special limited edition having the greatest number of special features.
2. Other limited edition rather than trade edition.
3. Special binding rather than trade binding.

C. *Illustrations:*

1. Illustrated rather than unillustrated.
2. Illustrations in color rather than black and white.

D. *Special Features:*

1. With thumb notches or index tabs rather than without.
