Department of Veterans Affairs

§4.124a Schedule of ratings—neurological conditions and convulsive disorders.

[With the exceptions noted, disability from the following diseases and their residuals may be rated from 10 percent to $100 \; \text{percent}$ in proportion to the impairment of motor, sensory, or mental function. Consider especially psychotic manifestations, complete or partial loss of use of one or more extremities, speech disturbances, impairment of vision, disturbances of gait, tremors, visceral manifestations, etc., referring to the appropriate bodily system of the schedule. With partial loss of use of one or more extremities from neurological lesions, rate by comparison with the mild, moderate, severe, or complete paralysis of peripheral nerves]

ORGANIC DISEASES OF THE CENTRAL NERVOUS SYSTEM

	Rat- ing
8000 Encephalitis, epidemic, chronic:	
As active febrile disease	100
Rate residuals, minimum	10
Brain, new growth of:	
8002 Malignant	100
NOTE: The rating in code 8002 will be continued	
for 2 years following cessation of surgical, chemotherapeutic or other treatment modality.	
At this point, if the residuals have stabilized,	
the rating will be made on neurological residu-	
als according to symptomatology.	
Minimum rating	30
8003 Benign, minimum	60
Rate residuals, minimum	10
8004 Paralysis agitans:	
Minimum rating	30
8005 Bulbar palsy	100
8007 Brain, vessels, embolism of.	
8008 Brain, vessels, thrombosis of.	
8009 Brain, vessels, hemorrhage from: Bate the vascular conditions under Codes 8007	
through 8009, for 6 months	100
Rate residuals, thereafter, minimum	100
8010 Myelitis:	
Minimum rating	10
8011 Poliomyelitis, anterior:	
As active febrile disease	100
Rate residuals, minimum	10
8012 Hematomyelia:	
For 6 months	100
Rate residuals, minimum	10
8013 Syphilis, cerebrospinal.8014 Syphilis, meningovascular.	
8014 Syphilis, meningovascular. 8015 Tabes dorsalis.	
NOTE: Rate upon the severity of convulsions, pa-	
ralysis, visual impairment or psychotic involve-	
ment. etc.	
8017 Amyotrophic lateral sclerosis:	
Minimum rating	30
8018 Multiple sclerosis:	
Minimum rating	30
8019 Meningitis, cerebrospinal, epidemic:	
As active febrile disease	100
Rate residuals, minimum	10
8020 Brain, abscess of: As active disease	100
	100

§4.124a

ORGANIC DISEASES OF THE CENTRAL NERVOUS SYSTEM—Continued

	Rat- ing
Rate residuals, minimum	1(
Spinal cord, new growths of:.	10
3021 Malignant	100
NOTE: The rating in code 8021 will be continued for 2 years following cessation of surgical,	
chemotherapeutic or other treatment modality.	
At this point, if the residuals have stabilized,	
the rating will be made on neurological residu-	
als according to symptomatology.	
Minimum rating	3
B022 Benign, minimum rating	6
Rate residuals, minimum	1
8023 Progressive muscular atrophy:	
Minimum rating	3
8024 Syringomyelia:	
Minimum rating	3
8025 Myasthenia gravis:	
Minimum rating	3
NOTE: It is required for the minimum ratings for	0
residuals under diagnostic codes 8000–8025,	
that there be ascertainable residuals. Deter-	
minations as to the presence of residuals not	
capable of objective verification, i.e., head-	
aches, dizziness, fatigability, must be ap-	
proached on the basis of the diagnosis re-	
corded; subjective residuals will be accepted	
when consistent with the disease and not	
more likely attributable to other disease or no disease. It is of exceptional importance that	
when ratings in excess of the prescribed min-	
imum ratings are assigned, the diagnostic	
codes utilized as bases of evaluation be cited,	
in addition to the codes identifying the diag-	
noses.	
B045 Brain disease due to trauma:	
Purely neurological disabilities, such as hemi-	
plegia, epileptiform seizures, facial nerve pa-	
ralysis, etc., following trauma to the brain, will	
be rated under the diagnostic codes specifi-	
cally dealing with such disabilities, with citation	
of a hyphenated diagnostic code (e.g., 8045-	
8207).	
Purely subjective complaints such as headache,	
dizziness, insomnia, etc., recognized as symp-	
tomatic of brain trauma, will be rated 10 per-	
cent and no more under diagnostic code 9304.	
This 10 percent rating will not be combined with any other rating for a disability due to	
brain trauma. Ratings in excess of 10 percent	
for brain disease due to trauma under diag-	
nostic code 9304 are not assignable in the ab-	
sence of a diagnosis of multi-infarct dementia	
associated with brain trauma.	
3046 Cerebral arteriosclerosis:

38 CFR Ch. I (7-1-08 Edition)

DISEASES OF THE CRANIAL NERVES

SYSTEM—Continued			Det
	Rat-		Rat- ing
Purely neurological disabilities, such as hemi- plegia, cranial nerve paralysis, etc., due to cerebral arteriosclerosis will be rated under the diagnostic codes dealing with such specific disabilities, with citation of a hyphenated diag- nostic code (e.g., 8046–8207). Purely subjective complaints such as headache, dizziness, tinnitus, insomnia and irritability, recognized as symptomatic of a properly diag- nosed cerebral arteriosclerosis, will be rated 10 percent and no more under diagnostic code 9305. This 10 percent rating will not be combined with any other rating for a disability due to cerebral or generalized arteriosclerosis. Ratings in excess of 10 percent for cerebral arteriosclerosis under diagnostic code 9305 are not assignable in the absence of a diag- nosis of multi-infarct dementia with cerebral arteriosclerosis.	Hat- ing	Disability from lesions of peripheral portions of first, second, third, fourth, sixth, and eighth nerves will be rated under the Organs of Spe- cial Sense. The ratings for the cranial nerves are for unilateral involvement; when bilateral, combine but without the bilateral factor. Fifth (trigeminal) cranial nerve 8205 Paralysis of: Complete	50 30 10

THE EPILEPSIES

	Rat- ing
A thorough study of all material in §§4.121 and 4.122 of the preface and under the ratings for epilepsy is necessary prior to any rating ac- tion.	
8910 Epilepsy, grand mal.	
Rate under the general rating formula for major seizures.	
8911 Epilepsy, petit mal.	

THE EPILEPSIES—Continued

	Rat- ing
Rate under the general rating formula for minor	
seizures.	
NOTE (1): A major seizure is characterized by	
the generalized tonic-clonic convulsion with	
unconsciousness.	
NOTE (2): A minor seizure consists of a brief	
interruption in consciousness or conscious	
control associated with staring or rhythmic	
blinking of the eyes or nodding of the head	
("pure" petit mal), or sudden jerking move-	
ments of the arms, trunk, or head (myoclonic	
type) or sudden loss of postural control	
(akinetic type).	
General Rating Formula for Major and Minor Ep-	
ileptic Seizures:	
Averaging at least 1 major seizure per	1 10
month over the last year	10
Averaging at least 1 major seizure in 3	
months over the last year; or more than	
10 minor seizures weekly	8
Averaging at least 1 major seizure in 4	
months over the last year; or 9-10 minor	6
seizures per week At least 1 major seizure in the last 6 months	0
or 2 in the last year; or averaging at least	
5 to 8 minor seizures weekly	4
At least 1 major seizure in the last 2 years;	7
or at least 2 minor seizures in the last 6	
months	2
A confirmed diagnosis of epilepsy with a	
history of seizures	1
NOTE (1): When continuous medication is shown	
necessary for the control of epilepsy, the min-	
imum evaluation will be 10 percent. This rating	
will not be combined with any other rating for	
epilepsy.	
NOTE (2): In the presence of major and minor	
seizures, rate the predominating type.	
NOTE (3): There will be no distinction between	
diurnal and nocturnal major seizures.	
912 Epilepsy, Jacksonian and focal motor or sen-	
sory.	
913 Epilepsy, diencephalic.	
Rate as minor seizures, except in the presence	
of major and minor seizures, rate the predomi-	
nating type. 914 Epilepsy, psychomotor.	
1 1 3/1 3	
Major seizures: Psychomotor seizures will be rated as major	
seizures under the general rating formula	
when characterized by automatic states	
and/or generalized convulsions with un-	
consciousness.	
Minor seizures:	1
Psychomotor seizures will be rated as minor	
seizures under the general rating formula	
when characterized by brief transient epi-	
sodes of random motor movements, hallu-	
cinations, perceptual illusions, abnormali-	
cinations, perceptual illusions, abnormali- ties of thinking, memory or mood, or auto-	

Mental Disorders in Epilepsies: A nonpsychotic organic brain syndrome will be rated separately under the appropriate diagnostic code (e.g., 9304 or 9326). In the absence of a diagnosis of non-psychotic organic psychiatric disturbance (psychotic, psychoneurotic or personality disorder) if diagnosed and shown to be secondary to or directly associated with epilepsy will be rated separately. The psychotic or psychroneurotic disorder will be rated under the appropriate diagnostic code. The personality disorder will be rated as a dementia (e.g., diagnostic code 9304 or 9326).

§4.124a

Epilepsy and Unemployability: (1) Rating specialists must bear in mind that the epileptic, although his or her seizures are controlled, may find employment and rehabilitation difficult of attainment due to employer reluctance to the hiring of the epileptic

(2) Where a case is encountered with a definite history of (c) Whete assess is conclusive development should be unemployment, full and complete development should be undertaken to ascertain whether the epilepsy is the determining factor in his or her inability to obtain employment.
(3) The assent of the claimant should first be obtained for

(b) The assent of the clamatic should list be obtained to permission to conduct this economic and social survey. The purpose of this survey is to secure all the relevant facts and data necessary to permit of a true judgment as to the reason for his or her unemployment and should include information as to:

. Education;

(a) (b) (c) (d)

(a) Education;
(b) Occupations prior and subsequent to service;
(c) Places of employment and reasons for termination;
(d) Wages received;
(e) Number of seizures.
(4) Upon completion of this survey and current examination, the case should have rating board consideration. Where in the judgment of the rating board the veteran's unemployability is due to epilepsy and jurisdiction is not vested in that body by reason of schedular evaluations, the case should be submitted to the Director, Compensation and Pension Service.

[29 FR 6718, May 22, 1964, as amended at 40 FR 42540, Sept. 15, 1975; 41 FR 11302, Mar. 18, 1976; 43 FR 45362, Oct. 2, 1978; 54 FR 4282, Jan. 30, 1989; 54 FR 49755, Dec. 1, 1989; 55 FR 154, Jan. 3, 1990; 56 FR 51653, Oct. 15, 1991; 57 FR 24364, June 9, 1992; 70 FR 75399, Dec. 20, 2005]

MENTAL DISORDERS

§4.125 Diagnosis of mental disorders.

(a) If the diagnosis of a mental disorder does not conform to DSM-IV or is not supported by the findings on the examination report, the rating agency shall return the report to the examiner to substantiate the diagnosis.

(b) If the diagnosis of a mental disorder is changed, the rating agency shall determine whether the new diagnosis represents progression of the prior diagnosis, correction of an error in the prior diagnosis, or development of a new and separate condition. If it is not clear from the available records what the change of diagnosis represents, the rating agency shall return the report to the examiner for a determination.

(Authority: 38 U.S.C. 1155)

[61 FR 52700, Oct. 8, 1996]

§4.126 Evaluation of disability from mental disorders.

(a) When evaluating a mental disorder, the rating agency shall consider the frequency, severity, and duration of psychiatric symptoms, the length of remissions, and the veteran's capacity for adjustment during periods of remission. The rating agency shall assign an

38 CFR Ch. I (7-1-08 Edition)

evaluation based on all the evidence of record that bears on occupational and social impairment rather than solely on the examiner's assessment of the level of disability at the moment of the examination

(b) When evaluating the level of disability from a mental disorder, the rating agency will consider the extent of social impairment, but shall not assign an evaluation solely on the basis of social impairment.

(c) Delirium, dementia, and amnestic and other cognitive disorders shall be evaluated under the general rating formula for mental disorders; neurologic deficits or other impairments stemming from the same etiology (e.g., a head injury) shall be evaluated separately and combined with the evaluation for delirium, dementia, or amnestic or other cognitive disorder (see §4.25).

(d) When a single disability has been diagnosed both as a physical condition and as a mental disorder, the rating agency shall evaluate it using a diagnostic code which represents the dominant (more disabling) aspect of the condition (see §4.14).

(Authority: 38 U.S.C. 1155)

[61 FR 52700, Oct. 8, 1996]

§4.127 Mental retardation and personality disorders.

Mental retardation and personality disorders are not diseases or injuries for compensation purposes, and, except as provided in \$3.310(a) of this chapter. disability resulting from them may not be service-connected. However, dis-ability resulting from a mental disorder that is superimposed upon mental retardation or a personality disorder may be service-connected.

(Authority: 38 U.S.C. 1155)

[61 FR 52700, Oct. 8, 1996]

§4.128 Convalescence ratings following extended hospitalization.

If a mental disorder has been assigned a total evaluation due to a continuous period of hospitalization lasting six months or more, the rating agency shall continue the total evaluation indefinitely and schedule a mandatory examination six months after the veteran is discharged or released to
