

about the project, the applicant's financial need, and the project's purported benefit to be derived from the cost. Technical evaluation panelists will independently score each application before them and then discuss the merits/shortcomings of the application in an effort to reconcile any major discrepancies. A consensus on the score is not required. The highest scoring applications resulting from this second level of review will then be considered for award. We seek to maximize the benefits derived from the funding by crediting applicants with the greatest financial need and whose proposed activities provide the greatest benefit versus the cost.

(d) In addition to the project narrative, the applicant must provide an itemized budget detailing the use of the grant funds. If an applicant is seeking funds in more than one eligible activity within a program, separate budgets will have to be generated for each activity and then an overall or summary budget will have to be generated. For those applicants applying on line, the summary budget will be automatically generated by the e-grants system.

(e) Specific rating criteria for each of the eligible programs will be published in a Notice of Funding Availability that we will publish pursuant to the program's annual appropriation.

§ 152.6 Application review and award process.

(a) As stated in § 152.5, we will evaluate each application in the preliminary screening process to determine which applications best address the program's established priorities. The best applications as determined in this preliminary step will be deemed to be in the "competitive range." All applications in the competitive range will advance to a second level review by a technical evaluation panel. Using the evaluation criteria detailed in the Program Guidance and in the NOFA (both of which are published pursuant to this program's annual appropriation), the panelists will score each application they evaluate. The assigned score will reflect the degree to which the applicant: clearly relates their proposed project; demonstrates financial need; and, details a high benefit to cost value of the pro-

posed activities. We will provide the panelists the complete application content for their evaluation. We will also provide them with reference materials for national standards or regulations and guidelines with respect to typical costs for proposed apparatus and equipment purchases.

(b) Our award decisions will be based on the stated priorities of the grant program first, then on the demonstrated need of the applicant and the benefits to be derived from the proposed projects. We will make awards on a competitive basis, *i.e.*, we will fund the highest scored applications before considering lower scored applications.

(c) In a few cases, to fulfill our obligations under the law to make grants to a variety of departments, we may also make funding decisions using rank order as the preliminary basis, and then analyze the type of fire department (paid, volunteer, or combination fire departments), the size and character of the community it serves (urban, suburban, or rural), and/or the geographic location of the fire department. In these instances where we are making decisions based on geographic location, we will use States as the basic geographic unit. We may also base our funding decisions on previous grant awards funded by this program and/or grantees' performance on previous grants and a technical evaluation of reasonable costs for labor, services, materials or equipment.

§ 152.7 Grant payment, reporting and other requirements.

(a) Grantees will have twelve months to incur obligations and complete the scope of work to fulfill their responsibilities under this grant program. The performance period of each grant will be detailed in the Articles of Agreement that we provide each grantee. Grantees may request funds from FEMA as reimbursement for expenditures made under the grant program or they may request funds for immediate cash needs under FEMA regulations (44 CFR 13.21). Advances of funds may also be approved to meet immediate cash needs.

(b) Generally, fire departments cannot use grant funds to pay for products
